STHRDS
ACKNOWLEDGMENT RECEIPT

DOST FILE

TO-SCH-F13
Rev. 3 Eff: 17 Apr 2024
RRG/smvg

Date: 03-03-25

Name: Briones Errol Francis, R.
(Last Name, First Name, MI.)

Mobile Number: 09502716218

Email Address: errolbriones6@gmail.com

Batch & Program: 2023, Merit
sample: 2022, RA 7687

Course, School: BS Biology, ARU Main
sample: BSED Mathematics, WVSU Main

Periodic Requirements

- [ ] Official Grades
  _____ semester/term SY _____
- [ ] Registration Form
  _____ semester/term SY _____
- [ ] Statement of Account/Official Receipt _____
  _____ (amount)
  _____ semester/term SY _____
- [ ] Letter of Appeal/Certification for INC Grade/s
- [ ] Thesis Form
- [x] Others: - THESIS GRANT FORM

Other Requirements

- [ ] Reply Slip
- [ ] Scholarship Agreement (5 copies)
- [ ] Scholar's Information Sheet
- [ ] Visitation Map
- [ ] Landbank Savings Account
- [ ] Course Prospectus
- [ ] Transcript of Records
- [ ] Diploma

For inquiries/follow up, you may call at (033) 330-1565 loc. 107 or email scholarship@ro6.dost.gov.ph

Received by,

MEIKKA VILLANUEVA
(Signature over Printed Name, Position)

- [ ] Regional Office
- [x] PST Office
- [ ] University Coordinator

REMARKS

- [ ] Documents complete and proper
- [ ] Lacks the following:

Verified by: Date:

Scholarship Program: JLSS
School: Aklan State University - Banga

Name: Errold Francis R. Briones
Course: BS in Biology
Year of Award: A.Y. 2023

Microplastic Density and Its Correlation to Microbial Hitchhikers in the Intertidal and Inland Areas of New Washington, Aklan
Title of Thesis

Brief Rationale

The microplastic density was assessed and its correlation to microbial hitchhikers in the intertidal and inland areas of New Washington, Aklan, specifically: Barangays Tambak, Poblacion, Ochando and Dumaguit. Local and international studies are attesting to the importance of microplastic pollution and microbial hitchhiker awareness in the environmental matrices and the adverse effects brought by neglecting this global phenomenon. As such, microplastic and microbial hitchhiker awareness and assessment on the intertidal and inland water zones of the economically significant municipality of New Washington, Aklan will benefit the locality that depends on these areas for its livelihood, housing, and food source.

Objectives

Generally, the study aims to assess the correlation between microplastic density (microplastic pieces / m^3) and microbial concentration in the intertidal and inland waters of New Washington, Aklan.

Specifically, the study aims to cover the following:

1.) to determine microplastic density and types in the inland and intertidal areas
2.) to determine the microbial concentration (CFU)
3.) to determine the relationship of microplastic density to the microbial concentration

Methodology

Determine sampling stations → sample collection → microbial analysis → visual analysis through microscopy → hot needle confirmatory test → FTIR Spectroscopy → Data Analysis → Statistical Analysis
